

Questionnaires for Tropiflora Limited (ZS1010613)

Self assessment questionnaire

The Sedex Self-Assessment Questionnaire (SAQ) asks questions about how your site operates and what systems are in place to manage social and environmental challenges. The latest version was released in February, 2020. [Please click here for guidance on completing the SAQ.](#)

Once your questionnaire is complete, finalise your answers using the 'Finalise Answers' button. You can then go to the Management Controls in My Business report in Sedex Analytics to see an assessment of the systems your business has in place to manage risk. [Click here for guidance on the key elements of a management system.](#)

The SAQ should be updated every six months, allowing your business and customers to track progress made over time.

Other questionnaire

In this section you will find any other questionnaires that you might have been asked to complete by your customers. If your site completed the previous version of the Sedex SAQ you can access your answers by viewing the 'legacy' SAQ. The legacy SAQ remains visible to your customers with the appropriate permission settings granted by your company.
